

WOOLPRODUCERS  
AUSTRALIA

WA SHEARING INDUSTRY ASSOCIATION (INC)

The Shearing Contractors'  
Association of Australia

In a joint wool industry initiative, the Shearing Contractors Association of Australia, the West Australian Shearing Industry Association, Australian Wool Innovation, and WoolProducers Australia have developed a wool shed poster to help champion higher standards in woolsheds across Australia.

The free A2 size poster is designed to be placed in a prominent position in all shearing sheds, to remind wool growers and wool harvesters of their joint responsibilities and expectations to look after themselves and the animal.

The poster is a reference point for everyone involved in wool harvesting to work together, to do their best to achieve a safe and effective workplace and to ensure sheep are treated humanely.

The points outlined on the document complement relevant state laws regarding animal welfare, workplace health and safety and the prohibition of drug use.

The poster will be available in the March edition of AWI's *Beyond the Bale* and is also available from mid-March by contacting the following:
